

Press Release

The leading international trade fair A+A makes a statement on the occasion of the World Day for Safety and Health at Work

www.AplusA.de

Düsseldorf, 03 May 2023 – In a globally connected world themes related to sustainable safety and security at work, that also include supply chains, play a prominent role. This is why in 1984 the International Labour Organisation (ILO) launched the World Day for Safety and Health at Work. Although in Germany occupational safety gained unprecedented attention especially due to the pandemic, a lot also remains to be done here. This is shown not least by the high sickness rates and number of days lost.

The world's leading trade fair and congress for safety, security and health at work, A+A, together with the trade fair's advisory board¹ is also making a statement across all its communication channels on the occasion of this international day under the hashtag

#WelttagfürSicherheitundGesundheit/WorldDayforSafetyandHealth

by raising awareness about worldwide developments in this field with informative posts.

Trend forums on safety and protection at work

A+A with its international trend forums as well as products and solutions for personal protective equipment (PPE), fire and environmental protection or disaster relief at companies all the way down to ranges for the ergonomic and healthy workplace design puts sustainable occupational safety and health in new working worlds in the international spotlight.

At the A+A Congress 2023 OSH actors and decision-makers from industry, the skilled crafts, administration, politics and science explore national and global political advances and recent strategies like "Vision Zero" as well as occupational science findings from applications-oriented
